About Myself

As a B.Tech. student at KIIT University, I have developed a passion for creating technology that makes real differences in people's lives. My journey through AI and IoT development has led me to build everything from agricultural support systems to assistive technology for visually impaired users. I believe in combining technical skills with a deep understanding of human needs because what is the point of technology if it does not help someone? I am currently seeking an internship where I can apply my skills in AI, machine learning, and development while continuing to grow alongside industry professionals.

EDUCATION

Bachelor of Technology

KIIT University, Bhubaneshwar, Odisha 2022-2026.

PROJECTS

KrishiSarathi

Extracted and processed valuable data from agricultural research papers and books to train our custom LLM, ensuring it provided practical advice rather than just theoretical knowledge.

Smart Glasses

Spent weeks fine-tuning obstacle detection features to calculate accurate distances and provide timely audio feedback.

Live Life

Collected data through web scraping from Reddit discussions about depression and anxiety, being careful to preserve privacy.

SKILLS

AI & Machine Learning

Database & Tools

Version control with GitHub
Containerization with Docker
SQL database management
Data extraction and analysis
Natural language processing

PROGRAMMING LANGUAGES

JAVA

Python
